

InsectPro

Sustainable Protein for a Greener Tomorrow-Insect Meal

Revolutionizing the Future of Feed with Nature's Perfect Ingredient

Our protein meal is mostly used in sectors like aqua and pets. We offer a sustainable alternative to traditional sources that are often cultivated, causing significant negative environmental impacts.

we are pioneering the commercialisation of insect-meal, harnessing its exceptional quality and scalability to transform the animal feed industry

our cutting-edge production facilities and rigorous quality control measures ensure a consistent , high protein product that meets thegrowing demand for sustainable feed solutions

Marketing

Insect-based protein as a sustainable and high-quality protein source for animals.

PRODUCT

- Insect meal

OUR GOAL

Our mission is to revolutionize aquaculture by replacing traditional fish meal with insect protein, fostering a sustainable, resource-efficient, and environmentally friendly approach to fish feed. We are dedicated to advancing the use of insect protein as a viable and nutritious alternative that supports the health and growth of farmed fish while minimizing ecological impact. Through innovation, collaboration, and commitment to sustainability, we aim to lead the aquaculture industry toward a more resilient and responsible future.

BUYER

- Aqua-Cultivation

Processing plants that convert our protein meal into, aqua, fish, shrimp etc.

- Food For Pets

i It is being used in different kinds of pet food manufacturing units around the globe

NURTURE

Product

Our aim is to produce source of high-quality protein powder for Aqua industry, replacing the traditional fish meal. This insect-meal provides the essential proteins, amino acids and aids for good digestion for use in aqua feed, pet food and more.

Insect Meal Specification

SUSTAINABLE AND ECO-FRIENDLY NUTRITION
